Android Wear: Create a watch face

Android Wear

In this codelab you'll learn how to create an analog watch face and customize it to our needs, keeping best practices for the platform in mind.

 120 min

Android Wear watch face

This codelab will introduce you to the key concepts to creating your own watch face for Android Wear. It will then walk you through customising an analog watch face. There is also a bonus section on using the Palette API to automatically choose a color for the watch face if you have the time. By the end of the codelab, you'll have a customized watch face that you can call your own.
